WELCOME
TO YOUR MERIDIAN

PINNACLE

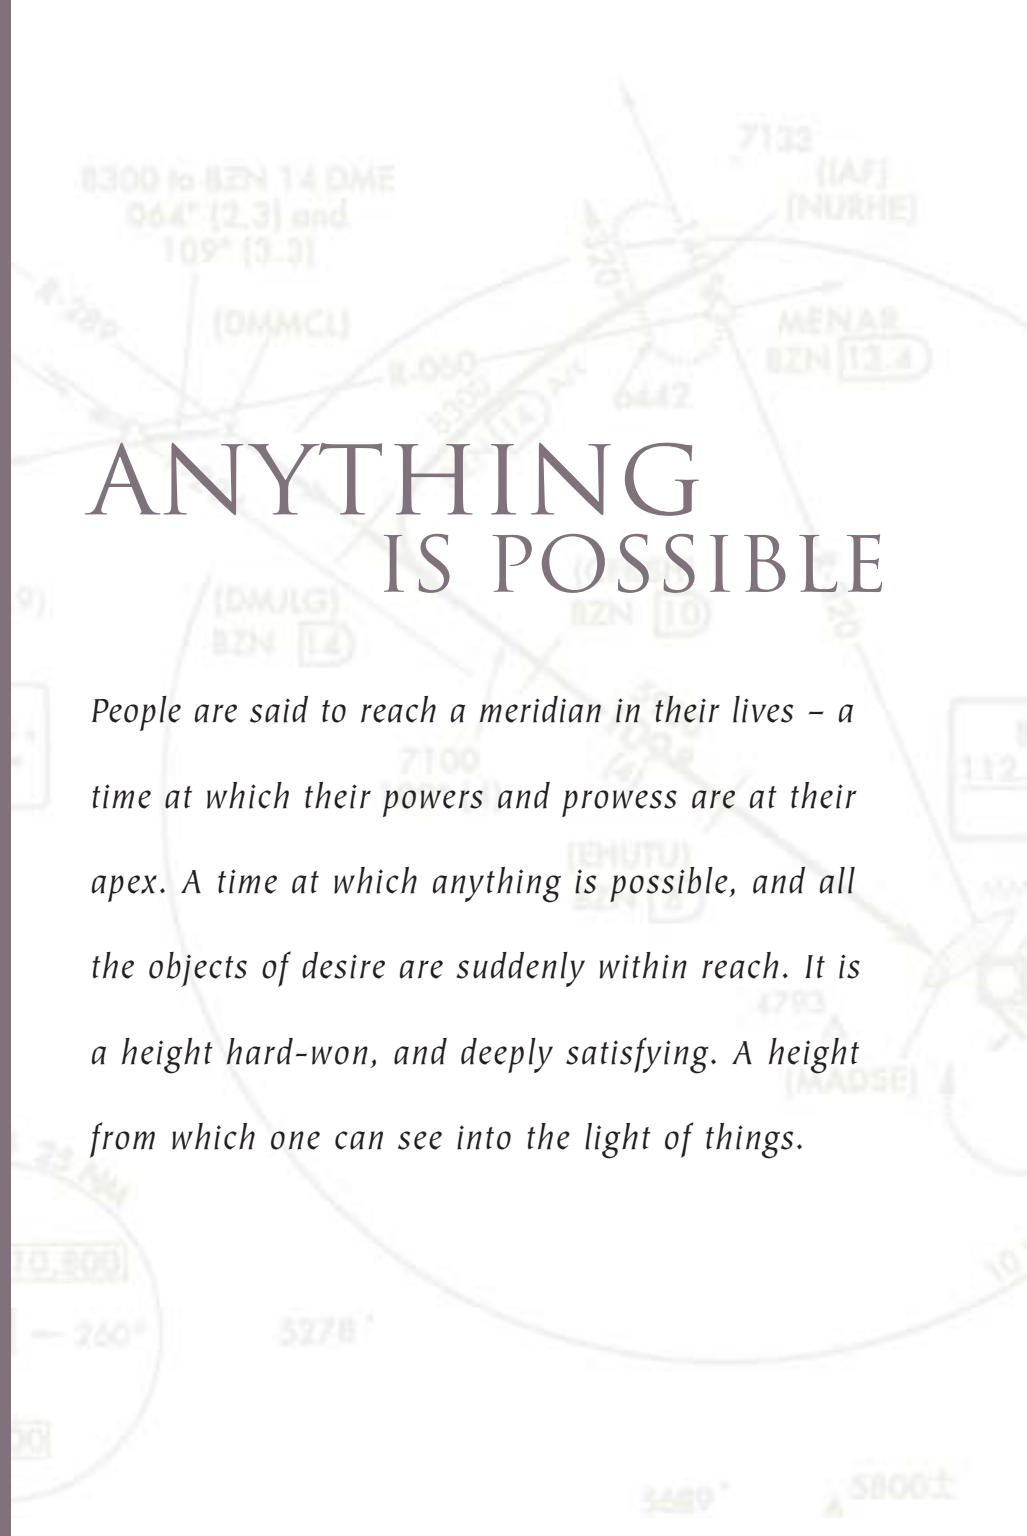

MERIDIAN

ME-RID-IAN *n.* (arch) point at which sun or star attains highest altitude; (fig.) prime, full splendor; the highest point or period of highest development or perfection; culmination; 2. *a.* Of noon; (fig). Of the period of greatest splendor, vigor, etc.

ANYTHING IS POSSIBLE

People are said to reach a meridian in their lives – a time at which their powers and prowess are at their apex. A time at which anything is possible, and all the objects of desire are suddenly within reach. It is a height hard-won, and deeply satisfying. A height from which one can see into the light of things.

*"From every angle, the new Piper Meridian is the most exciting personal aircraft available."
~ Flying Magazine*

MERIDIAN

Since 1937, Piper has remained an icon of uncompromising quality and ingenuity. In fact, over almost a century of aviation, Piper has come to represent the very essence of the freedom of flight. But the Meridian marks the beginning of a whole new chapter in history. With the Meridian, Piper has taken an unapologetic leap into the realm of outrageous elegance, luxury, performance, and indulgence. Designed for pilots with a burning desire for more, the Meridian is exuberant, powerful and stylish – the perfect marriage of technology, creativity and tactile pleasure. Its release rocked the world of general aviation. It will rock yours.

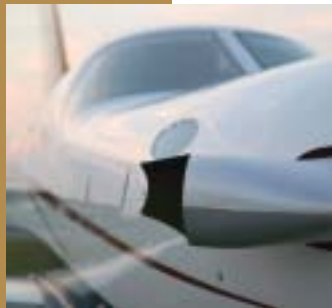

MERIDIAN

MERIDIAN

Florida to Denmark in 16 flight hours; a 260-knot maximum cruise speed; a full-fuel range of over 1,000 nautical miles. That takes power. And, with its Pratt & Whitney PT6A-42A engine, the Meridian delivers it in spades. So much power and performance in fact that J. Mac McClellan of *Flying Magazine* calls flying it, "as close to a jet as you can get and still have a propeller."

"The Meridian is an all-around good performer," says AOPA Pilot, "with the ability to get into and out of any reasonably sized airport and fly nonstop across half a continent."

But the Meridian is so much more than raw power. It is poetry and harmony combined with innovative design and sophisticated technology. The result is a rare breed of aircraft that satisfies your needs as a pilot, while instilling a very high degree of confidence in your passengers. With the power to cruise high above most weather, it delivers a quiet, smooth, jet-like ride. Of course, that's what you'd expect from a sophisticated turbine business aircraft like the Meridian. And that's just the beginning.

POWER

MERIDIAN

*“New Piper has exceeded expectations in design and execution...
The Meridian exemplifies what an aircraft should provide a serious
pilot with: simplicity, thoughtful design, friendly flightdeck layout,
confidence-inspiring handling, great comfort and excellent fit and
finish...The closest thing to the perfect aircraft in my experience.”*

~ Dave Higdon,

Flight International

“The Meridian

*fits the Piper mold in that it delivers
a lot of value for the money.”*

~ AOPA Pilot

LUXURY

Luxury is not an extravagance. Or a mere indulgence. It is, in the case of the Meridian, simply a compliment. It is more than comfort. Comfort is the beginning. Luxury is the completion of the sentence. The Meridian's interior has been styled to fit your needs even better, and the newly designed pilot's and copilot's seats offer greater comfort and more headroom. Accommodating. Well-appointed. Indulgent. Flying says, "The fit and finish are the best Piper has ever delivered." Over 200 owners couldn't agree more.

“What an airplane!

The Piper Meridian should find its way to the top of the ‘have to have’ list.”

~ The AutoPilot

“The Meridian cabin is surprisingly comfortable with enough legroom and headroom for WWE-sized passengers. Each aircraft is custom-crafted to the customer’s specifications. And ‘crafted’ is the operant word. The leather work... displayed excellent handiwork, reminiscent of Coach goods.”

~ Business and Commercial Aviation

MERIDIAN

PERFORMANCE

Power, certainly. Luxury, absolutely. But performance is what the Meridian is all about. The Meridian's all-glass panel is the true definition of the word. Featuring the latest Avidyne FlightMax Entegra Integrated Flight Deck with integrated dual Air Data/Attitude Heading Reference Systems (ADAHRS), the Meridian's avionics suite is second-to-none when it comes to performance, convenience, and situational awareness. Once you see it, you'll never look at any airplane the same way again.

Optional Equipment Shown

PRECISION

The Meridian's Entegra package treats you to three large 10.4" displays - two Primary Flight Displays (PFDs), one for the pilot and another for the copilot, and the third, centrally mounted, Multi-Function Display (MFD). The system, driven by the dual Air Data/Attitude and Heading Reference Systems (ADAHRS), provides unparalleled accuracy, reliability, and redundancy. The PFDs display all necessary aircraft flight instruments, as well as an Electronic Horizontal Situation Indicator (EHSI). The MFD features a moving map, radar display, flight plan information and the EMax Engine Indicating System. The EMax Engine Indicating System gives you easy-to-read graphic representations of engine performance. To further aid you in optimizing your Meridian's capabilities, the EMax system also provides a graphical fuel totalizer, as well as engine performance data recording which can be downloaded for Engine Condition Trend Monitoring. Your front

office also features a pair of Garmin GNS 430 NAV/COMM/GS/GPSs, Garmin GTX-330 digital transponder with Traffic Information System, S-TEC's MAGIC 1500 Automatic Flight Control System, and a Honeywell-Bendix/King radar.

There are also a host of optional capabilities, including Honeywell's Integrated Hazard Avoidance System (IHAS) 8000 featuring Traffic Awareness, Terrain Awareness and Warning, and Stormscope. Plus, you can add the Fully Integrated MultiLink Datalink and CMax Approach Charts. The MultiLink system includes an XM weather broadband link for high-speed weather updates. Complementing the XM capabilities is Avidyne's Narrowcast system which will allow aircraft flight tracking and two-way text messaging. The CMax chart services provide electronic approach charts and airport maps utilizing JeppView.™ These charts are displayed directly on the MFD along with the aircraft's position and flight plan.

PRIDE

There are few moments when pride is absolutely appropriate. The moment when Dick Dumais, and his copilot and wife, Rosemary, took delivery of the very first Meridian was one of those. The handshake that he shared with New Piper's president, Chuck Suma, translated the feeling both ways. Since that day, over 200 other successful individuals and companies have joined an elite and prestigious club – they are all Meridian owners. They, too, know the feeling of pride and satisfaction in knowing that they can travel unhindered by schedules, stopovers, and security lines. Theirs is a world that has reached its personal meridian. Isn't it time yours did too.

OWNING THE DREAM IS EASIER THAN EVER.

Our Step-up Program helps you progress through our entire line of enticing aircraft as your skills and needs change. It also helps make new aircraft trade-ins even more rewarding.

As a qualified program member, most of your original purchase price may be applied toward the purchase of the next-in-line New Piper model. Certain restrictions apply, so ask your dealer for more details.

To simplify the purchase of your new aircraft, the Team at Piper Financial Services can handle all the financial transaction details for you...seamless, easy and hassle-free...only for New Piper customers.

Please call our toll-free number 866-FLY-PIPER (866-359-7473) www.newpiper.com
